Summary

I am a committed hardworking individual with excellent communication skills and a keen mind, always ready to learn new skills and, improve on already acquired ones. My extended experiences in technical, operational and Finance roles have afforded me a unique perspective and knowledge to finance and data analysis, business development and overall leadership and decision making. I am equally at ease whether working in teams or on my own.

Core / Technical Skills

- Machine Learning Applications in Finance (Supervised, Unsupervised, Time Series)
- Programming and Financial Libraries (Python, SQL, Pandas, PyViz, APIs etc.)
- Blockchain Technology (Solidity, Remix, streamlit)
- Competence in establishing and enhancing Project Management Strategies
- Excellent planning, organization, decision making and leadership skills
- Compiling and presenting detailed research, complex financial and, statistical data
- Certified SAP FICO consultant - Financial accounting (GL, A/P, A/R, AA, SPGL)
- Certified SAP Business associate with SAP ERP 6.0
- Experienced in using Data mining and Business Intelligence tools. Quicksight, Tableau
- Microsoft office including Word, Power Point, Project, Excel (Pivot Tables), Power BI, Microsoft Query

Projects

- Tokenization of Real Estate <https://github.com/makhlghi001/Project-3--Real-Estate-Tokenization-SmartContract>
 - Developed a Smart contract in Solidity for the backend and streamlit front end to tokenize commercial real-estate. Tasked with writing the crowdsale ERC20 contract in remix and streamlit front end python/vscode. The contract will allow companies to crowd source real estate funding on Ethereum blockchain
